BSN medical is a global medical device company

BSN medical is a global leader in the worldwide healthcare market specialising in the areas of Orthopaedics, Traditional and Advanced Wound Care, Compression Therapy and the effective treatment and prevention of Sports Injuries. We are focused on the development of world-class branded products that offer high quality solutions for our caregivers and patients.

BSN medical has production facilities in Germany, France, USA, Colombia, Mexico, Pakistan, South Africa and New Zealand and operates worldwide via affiliates, joint ventures and distribution agents. We employ more than 4,000 people globally.

Several of our well-known brands – Gypsona®, Dynasport®, Surgipak®, Leuko®, Delta-Cast Elite®, Actimove® and Advanced Wound Care Range Cuticell®, Leukomed®, Cutimed® Siltec and Cutimed® Sorbact® – are among the most trusted names in the healthcare profession.

Vision & Values

BSN medical has a corporate Vision, which is what we are aiming to be as a business, and corporate Values which guide the way we work to achieve it.

Our Vision is:
To grow the value of our business, by developing cost-effective medical products and therapy solutions, to meet the needs of patients and customers.

Our Values are:
• Believing in our PEOPLE and valuing their diversity
• Succeeding through TEAMWORK across organisational boundaries and cultures
• Listening to our CUSTOMERS and being responsive to their needs
• Constantly striving for higher PERFORMANCE and improving what we do

SURGIPAK® STERILE SERVICE

BSN MEDICAL has a sterile pre-pack range, consisting of Ward Procedure Trays, Theatre Packs and Supplementary Packs, which provide the most cost effective way for any healthcare service to operate. Designed to save time, labour and hassles, each pack is conveniently laid out with every surgical product required for the stipulated procedure.

Surgipak® products are mechanically packed, heat sealed and sterilized by gamma radiation ready for immediate use.

Should you be interested in this service please contact your sales representative for further information.
BSN medical
Product Range
Tensoplast® EAB

Porous elastic adhesive bandage for flexible, strong support and compression.

INDICATIONS
- Prophylactic use in active sport
- General purpose fixation
- Where firm directional support or immobilisation is required
- Varicose conditions
- Retention of dressings and devices, e.g. post-orthopaedic and general surgery or over a muscular wound
- Strong support and consistent control for injured ligaments or joints
- Plays a key role in sports injuries in support of muscular areas

BENEFITS
- 100% cotton
  - Cool and comfortable
- Porous
  - Allows free air circulation
- Zinc oxide adhesive
  - Provides maximum support and stability without unnecessary bulk
- Convenience
  - Available in a variety of sizes for easy application, including body contours
- "Blown" adhesive
  - Allows skin to breathe
- High quality extensible substrate
- Easy unwinding tension
- Easy to apply
  - Distinctive central line to encourage accurate overlap

Leukoband® S EAB

Premium quality bandage offering strong support and firm compression for the prevention, treatment and rehabilitation of injuries, where flexible support is required.

INDICATIONS
- Plays a key role in sports injuries in support of muscular areas
- Provides overall even compression
- Strong, consistent support to maintain the stability of an injured joint or ligament
- Used to hold dressings in place, e.g. post-orthopaedic and general surgery or over a muscular wound
- Limited stretch and firm regain properties

BENEFITS
- Cotton
  - Cool and comfortable
- Porous
  - Allows free air circulation; perspiration and exudate can also escape
- Zinc oxide adhesive
  - Provides maximum support and stability without unnecessary bulk
- Convenience
  - Available in a variety of sizes for easy application including body contours.

Co-Plus® LF

Flexible, cohesive support bandage, ideal for use by healthcare professionals on patients with a sensitivity to natural rubber latex.

**INDICATIONS**
- Application and retention of dressings, splints and hot or cold packs, etc. to sensitive skin
- General support and compression of soft tissue injuries
- Prophylaxis against sports injuries

**BENEFITS**
- Latex free composition makes it ideal for use on sensitive skin
- Unique construction provides consistent, non-slip support
- Easy to use - hand-tearable in both directions

Preferred by patients
- Porous structure aids skin breathability
- Flexible substrate ensures comfort and ease of movement even when applied to the most awkward body contours
- Available in a wide variety of colours, making it both functional and attractive to wear
- Co-Plus® LF sticks only to itself (not to skin or clothing), making the bandage easy to apply and allowing for effortless, pain-free removal

**Latex free**
- Ideal for use on suitable skin

**Easy to use**
- Hand-tearable in both directions

**Porous**
- Aids skin breathability

**Flexible substrate**
- Ensures comfort and ease of movement even in most awkward body contours

Available in a wide variety of colours
- Functional and attractive to wear

Only sticks to itself
- Making it easy to apply and allowing effortless, pain-free removal

Elastomull® haft

Elastic, crepe-like, woven retention bandage with high cotton content (40% cotton, 30% viscose, 30% polyamide) and a latex microdot coating for cohesive effect. The unique adhesive properties of Elastomull® haft prevent the slippage problems associated with conventional fixation bandages.

**INDICATIONS**
- Fixation of wound dressings on all parts of the body, especially on joints
- Fixation of plaster splints
- Non-slip liner under compression bandages

**BENEFITS**
- Non-slip due to cohesive coating
- Adheres to itself but not to the skin or clothing
- Easy application and removal
- Skin friendly and pleasant to wear
- Porous weave structure ensures high air-permeability
- The high cotton content makes the bandage well tolerated by the skin
- High elasticity and high stretch reserve prevent constriction and congestion
- Can be sterilised in autoclaves

**Tensogrip®**

An elasticated tubular bandage which provides even pressure and support over varying body contours.

**INDICATIONS**
- General light support for treatment of minor soft tissue and joint injuries
- Firm retention of wound dressings

**BENEFITS**
- Easy to apply - Once the correct size has been selected, patients can easily reapply the bandage in an outpatient situation
- Exerts even pressure and compression
- Non-slip - The bandage maintains its position to ensure effective treatment and patient comfort
- Washable and re-usable without any loss of performance
- Wide range of sizes

---

**Elastomesh®**

A combination of nylon and latex threads knitted into a continuous tubular length.

**INDICATIONS**
- Dry, superficial wounds
- Difficult dressing areas
- Retaining E.C.G. electrodes and I.V. catheters

**BENEFITS**
- Rapid fixation
  - Quick and easy application and dressing changes, easy wound inspection
- Open mesh construction
  - Cool and comfortable
- Highly elastic
  - Reliable fit without slipping
- Unrestricted mobility
  - Readily adapts to the body’s contours without causing congestion or constriction
- Tubular construction
  - Can be cut at any point in any direction without tearing or fraying
- Extremely comfortable
  - Holds dressings firmly in place in difficult areas i.e. the head, trunk, hip and extremities
- Economical
  - Wound dressings can be changed without the need for a new fixator
- Versatile
  - A size for all applications

In most cases, only a single layer is needed to create a fixation bandage.

Cutisoft® Triangular Bandages

Manufactured from heavy calico or gauze cloth for durability, comfort and support.

**INDICATIONS**

Versatile support bandages for sprained or fractured limbs, also for use in broad bandaging techniques.

**BENEFITS**

- Versatile
- Economical
- Rigid and strong
- Can be autoclaved
- Can be included in First Aid Kits

Lightweight retention bandage with stretch and regain elastic properties for excellent conformability and secure retention of dressings.

**INDICATIONS**

- General dressing retention for all body areas
- Where frequent dressing changes are needed
- For retention over dry to lightly exuding wounds
- Inclusion in First Aid Kit

**BENEFITS**

- Light and soft
- Woven polyester, viscose and cotton blend
- Secure
- Holds dressings firmly in place
- Conformable
- Conforms to difficult areas and allows maximum joint mobility
- Safe
- Strong elastic properties for free blood circulation and no constriction
- Porous
- Open construction allows good air circulation, preventing skin maceration
- Quick and easy application

Minimum order quantity: 12 bandages
Elastoform®

100% cotton woven bandage with light stretch and regain properties.

INDICATIONS
Ideal for retaining heavier dressings over light to moderately exuding wounds, where an absorbent and conformable bandage with minimal compression of the wound site is required.

BENEFITS
- Natural, woven cotton bandage
  • Cool, comfortable and absorbent
  • Will not cause skin reactions
  • Allows free circulation of air to help prevent skin maceration
- Safe
  • Contains no elastomers, will not constrict
- Conformable and light
  • For use on all body areas
- Autoclavable

Triple Cross® Premium

Woven bandage manufactured from the genuine crepe process using high twist yarns to give stretch and regain properties.

INDICATIONS
- Gentle support and compression to help reduce pain and maintain stability in sprains and strains
- Post-orthopaedic and general surgery
- Can also be used for heavy retention
- Fixation of splints and devices

BENEFITS
- Pure, woven cotton
  • Cool, comfortable and absorbent
- High twist yarns
  • Moderate stretch and regain properties
- Contains no rubber threads
  • Safe, won’t constrict blood circulation
- Sustained soft tissue support
  • Effective and economical
- Conformable
- Autoclavable
- Complies with SANS 945 Type 2 specification
  • Ensures consistent standards
- Stable construction
  • Retains volume of dressing over heavily exuding wounds

**INDICATIONS**

- Retention of bulky dressings over moderate exuding wounds (not involving joints)
- Light support to minor soft tissue injuries

**BENEFITS**

- Light to touch
- Ideal for bulky dressing
- Ideal for short-term usage
- e.g. emergency application
- Affordable

**INDICATIONS**

- Firm support for joints and associate structures, e.g. post-orthopaedic and general surgery
- Moderate compression bandaging in the treatment of varicose symptoms and for prophylaxis thrombosis
- Specially indicated when using the R.I.C.E.R. regime (Rest, Ice, Compression, Elevation, Referral) in treating soft tissue injuries
- Used as preventative ankle-strapping for sport
- Secures ice packs after injury when using R.I.C.E.R.
- Provides firm support to joints, ligaments and muscles, helping to prevent injury
- Used to provide moderate compression to help limit bleeding and decrease swelling

**BENEFITS**

- 100% Cotton crepe
  - Cool and comfortable
- Safe
  - Tolerated by the skin and unaffected by ointments or perspiration
- Conformable
  - Excellent stretch and regain properties for compression and support
- Economical
  - Washable and reusable, sterilisable and durable

Elastocrepe®

Superior quality, woven cotton bandage manufactured from high twist yarns, provides greater, lasting support and compression.

**INDICATIONS**
- Ideal for varicose veins and ulcers
- Treatment of sprains and strains
- During rehabilitation after orthopaedic surgery
- Control of oedema
- Ligament or muscular damage requiring firm pressure
- Where joint immobilisation or directional support is needed

**BENEFITS**
- 100% cotton crepe
- Cool and comfortable
- Economical
  - Washable and reusable
- Strong
  - Stable and durable
- Latex-free
  - Will not cause skin reactions
- Complete with fastening metal clips SANS 945 Type 1 compliant
  - Ensures consistent standards
- Autoclavable
  - Safe and will not cause constriction
  - Contains no rubber threads

Tensopress®

Tensopress® is a technically advanced cotton-rich, warp-knitted compression bandage incorporating a blend of cotton, viscose and elastomeric yarns.

**INDICATIONS**
Tensopress® is ideal for the effective control and treatment of venous ulcers resulting from venous insufficiency. It is also suitable for the compression of stumps following amputation and deep vein thrombosis therapy.

**BENEFITS**
- Reliable and cost-effective
  - Sustains an even and consistent compression for periods in excess of two weeks, if necessary
- Strong and easy to use
  - Time efficient
- Cotton rich
  - Cool and comfortable
- Easy to apply
  - Central yellow line aids correct overlap
- Sustained graduated compression
  - Precise control, stays firmly in place
- Controlled Compression
  - Consistent elasticity assists with achieving correct sub-bandage pressures

**Leuko® Sportstape Premium**

Non-stretch adhesive strapping bandage which provides strong support for joints and associated structures.

**INDICATIONS**
- Widely used as a preventive tape
- Used by patients for self treatment of abnormal patella tracking
- Ideal for taping wrists, fingers, ankles, knees etc. during rehabilitation and returning to sport
- Used as a general fixation tape

**BENEFITS**
- Firm support
- Prevents excessive joint movement which causes injury, e.g. ankle sprain
- Easy to use
- Conforms well to any area as it is lightweight
- Economical
- It is hand-tearable, therefore allowing optimum usage

*Strong, rigid adhesive support bandage*

*Strong, aggressive adhesive rigid tape for strapping joints under high stress*
**Strappal®**

Strappal® is an ‘easy-tear’, rigid strapping plaster. Strappal® is of a ‘lighter’ construction than Leuko® Rigid Strapping and is easy to use.

**INDICATIONS**

Strappal® is an economical immobilisation tape which is ideal for wrist, finger and ankle and for the prophylactic strapping of soft tissue and ligament injuries during rehabilitation, to prevent aggravation of an injury.

**BENEFITS**

- Easy to use, hand-tearable for quick and easy application
- Strong support, inextensible backing material provides rigid support
- Economical
- Latex free formula minimises the risk of an allergic reaction

**Leukotape® P**

A non-stretch, aggressive adhesive strapping bandage specifically developed for joint control with abnormal biomechanics causing pain, e.g. Patello-femoral malalignment.

**INDICATIONS**

- Ideal or abnormal patella tracking
- Ideal for knee taping when treating patients with patella femoral pain or abnormal patella tracking
- Ideal for joint taping in particular with joint instability, e.g. sprained ankle joint or shoulder pain due to impingement
- Used as a general fixation tape

**BENEFITS**

- Strong rayon material construction with very aggressive adhesive zinc oxide adhesive
- Strong rigid support - specifically developed for joint taping, e.g. knee or patella - used in conjunction with Hypafix® or Fixomull®
- Porous - allows free air circulation; perspiration and exudate can also escape

Leukotape® K

An elastic adhesive tape which activates skin and vessels through a Neuro-Proprioceptive application technique - achieves permanent massage through skin movement or displacement.

INDICATIONS

- Tension headache
- calf strain
- Extensor Tendinopathy
- Backache

BENEFITS

- As thin as skin and skin friendly
- Wavelike pattern of adhesive coating
  - Generates therapeutic effect
- Extensible
  - Optimally adjusts to the elasticity of the skin
- Release paper lamination
  - Backing paper assists for control of extension
- Polyacrylate adhesive
  - Low allergy
- Cotton Substrate
  - Robust and skin friendly

Meets the patient’s needs

- No side-effects
- High wearing comfort, all day effect
- Long wearing period up to one week without loss of quality
- No interruption of sporting activities, sauna and showers
- Easy to remove without any residue

Cutisoft® Wipes

Quick and efficient skin cleansing swabs for home, hospital or doctors rooms.

INDICATIONS

For skin cleansing prior to injection, e.g. arm or finger tips.

BENEFITS

- Individually sealed, ready to use non-woven swabs
- Saturated with 70% isopropyl alcohol
- Compact packaging of two swabs, perforated in the middle
- Ensures a hygienic injection
- Practical and cost-effective packaging: no separate bottles necessary, no dessication of the scab
- Easy to take away, e.g. for patients suffering from insulin-dependent diabetes mellitus

Leukotape® Remover

This product allows fast, painless adhesive tape or adhesive bandage removal. It eliminates the trauma normally associated with the removal of adhesive coated tapes and bandages.

**INDICATIONS**

- Removal of adhesive tapes / bandages
- Removal of any tape adhesive residue on the skin

**BENEFITS**

- Handy dispenser makes the product easy to use
- Solvent formulation allows painless removal of adhesive bandages and tapes

Tensospray®

The product is a convenient adhesive spray, which leaves a thin protective film over the surface of the skin. This provides an ideal layer for adhesive bandages and tapes, promoting excellent adhesive traction and reducing skin trauma on removal.

**INDICATIONS**

This adhesive spray is used on the skin before the application of a tape or elastic adhesive bandage.

**BENEFITS**

- Aerosol presentation allowing quick and easy application
- Provides a co-polymer layer which improves the effectiveness of the strapping
- Protects skin and encloses hairs - aids comfort and reduces trauma of bandage removal

Leukopor® was developed for patients with sensitive skin. It conforms to the body contours and is very comfortable to use. Thanks to its skin-friendly polyacrylate adhesive and breathable nonwoven backing Leukopor® is highly recommended for light dressing retention.

**INDICATIONS**
Light dressing retention and securing of probes, catheters and cannulae.

**BENEFITS**
- For very sensitive skin
- Easy to tear by hand
- Removes painlessly without residues
- Good initial and permanent adhesion
- Highly permeable to air and moisture

---

Leukofix® is a safe and reliable fixation for use with cannulae, catheters and for the retention of probes, tubes and dressings. Well tolerated by patients with sensitive skin. Leukofix® provides medical personnel with a fast and easy to use working aid.

**INDICATIONS**
Fixation of cannulae, catheters and for retention of probes, tubes and dressings.

**BENEFITS**
- Transparent film allows inspection of the skin underneath
- High initial and permanent adhesion
- Tears both lengthways and crosswise
- Removes painlessly without leaving residues
- Air and moisture permeable

Hypafix® S is an easy to apply, wide area wound dressing fixator ideal for frequently moved parts of the body, especially the joints. Ideal for dressing retention in particular of large post-operative wound dressings, gauze and absorbent compresses.

**INDICATIONS**

Hypafix® S Tape Indications
- Cosmetic surgery suture dressing
- Fixation of needles, tubes, catheters and drainage lines

Hypafix® S Sheet Indications
- Skin and graft donor site dressing
- Burns and graft site scar management
- Wide area dressings fixation
- Fixation of needles, tubes, catheters and drainage lines

**BENEFITS**

- Easy application - split liner for easy removal of release paper
- Good initial and permanent adhesion
- Large range of sizes and uses
- Well tolerated by patients with sensitive skin
- Good adhesion ensures reliable fixation, while wide area fixation of wound dressings prevents contamination
- Transversely elastic, non-woven fabric conforms well to the body surface, preventing congestion, constrictions and blood flow impairments
- When used as intended, Hypafix® S can be applied safely in combination with other materials and substances with which it comes into contact
- Readily loosened with ointment allowing for painless removal
- Excellent dressing retention without movement restriction

Fixomull® stretch can be easily cut to size and quickly applied anywhere on the body. It is ideal for skin prone to allergy.

**INDICATIONS**

- For wide-area fixation of wound dressings, also on joints and extremities
- Adheres firmly on convex and concave parts of the body.
- For fixation of instruments, probes and catheters
- Used with Leukotape® P to perform the McConnell Taping Technique

**BENEFITS**

Under strapping protection
- Particularly for patello femoral pain

Individual and economical
- Can be cut to the required size for many uses
- Saves material, no unnecessary wastage

Skin-friendly and safe
- The skin-friendly polyacrylate adhesive adheres reliably
- The soft backing material of non-woven polyester conforms to body contours
- Air and moisture-permeable

Fixomull® Transparent

Transparent and conformable wide-area fixation for reliable protection against water and bacteria.

**INDICATIONS**

• Waterproof, wide-area fixation of wound dressings on any part of the body as well as on joints and extremities
• Waterproof fixation of instruments, probes and tubes, catheters and measuring devices
• Hygienic fixation of ointment dressings

**BENEFITS**

- **Patient comfort**
  - The semi-permeable film lets the skin breathe
  - The polyacrylate adhesive is very well tolerated, even by patients with sensitive skin
  - The stretch properties of the dressing preserves the patient’s mobility

- **Reliable fixation**
  - The stretchable and conformable material makes the dressing very durable
  - The high adhesive power ensures reliable fixation

- **Optimal protection**
  - Allows for bathing and showering
  - Protection against contamination reduces the risk of wound infections
  - The dressing is soil-resistant and still looks good after prolonged use, reducing the number of dressing changes

- **Unobtrusive design**
  - The transparency of the film makes the dressing inconspicuous and it allows visual inspection of the wound environment

- **Easy to use**
  - Fixation can be applied easily and quickly by patients
  - Can be removed easily and painlessly
  - Leaves no residue upon removal
  - Cutting to size reduces wastage and saves money

Roll Plasters

An extensible strapping where conformability and comfort are high priorities when providing secure dressing fixation or strapping.

**INDICATIONS**

- Ideal for strapping of extremities and for retaining dressings.

**BENEFITS**

- Lengthways stretch allows joint movement
- Strong adhesive
- Wide range of uses
- May be cut to length
- Available in both fabric and waterproof variants for flexibility

Leuko® Extension Plaster

Premium quality bandage offering strong support and firm compression for the prevention, treatment and rehabilitation of injuries, where flexible support is required.

**INDICATIONS**

- Use where widthways support is required, e.g. strapping fractures of ribs and clavicles
- For dressing retention while enhancing directional support

**BENEFITS**

- Cotton rich
- Cool and comfortable
- Porous
- Allows free air circulation

**Tensoplast® Extension Plaster**

Rigid support along the length, and limited stretch, but firm support in the widthway direction.

**INDICATIONS**

- Where flexible widthway support, but limited horizontal movement is required, e.g. strapping of fractured ribs and clavicle
- Dressing retention while enhancing directional support
- General fixation

**BENEFITS**

- Cotton rich
- Cool and comfortable
- Porous
- Allows free air circulation, sweat escapes

**Coverplast® Classic (Fabric)**

- A strong and long-lasting fabric dressing that protects and cushions the wound. It offers flexible comfort that stretches with every movement

**Coverplast® Standard (Water-resistant)**

- This waterproof dressing has small openings that allow the skin to breathe. The soft wound padding will not stick to the wound

**Covermed® (Skin-friendly)**

- This comfortable and breathable dressing is especially kind to the skin, offering protection to even the most sensitive skin types

**Coverplast® Barrier (Anti-bacterial and waterproof)**

- The waterproof coating acts as a complete barrier against germs and bacteria, while still allowing the wound to breathe

**Coverplast® Detectable (Anti-bacterial and waterproof)**

- All the benefits of Coverplast® Barrier with the added advantages of X-ray, metal and visual detectability

**INDICATIONS**

- First aid dressings

**BENEFITS**

- A strong and long-lasting fabric dressing that protects and cushions the wound. It offers flexible comfort that stretches with every movement

Surgipak®

Sterile quality pre-packs in a convenient format that won’t fail you, no matter what.

INDICATIONS

Ward
- Catheter
- Dressing
- IV Dressing
- Ophthalmology
- Suction
- Swabbing

Theatre
- Abdominal
- Cardiothoracic
- Dental
- Dissecting
- ENT
- General Surgery
- Neurology
- Orthopaedics
- Obstetrics and Gynaecology
- Ophthalmology
- Plastic Surgery
- Suture
- Urology
- Vascular

Supplementary Packs:

Theatre
- Abdominal Swabs
- Sundry Theatre Swabs
- Bandages

Ward
- Sundry Swabs and Pads
- Bandages

BENEFITS

- Safe, quick and convenient
- Cost-effective and quality assured
- With Surgipak®, purchasing, stock control, patient invoicing and, most importantly, modern nursing technology are all one simple operation

Ready to use sterile packs. Only the right equipment will give you peace of mind.

Cutimed® Cavity® is a sterile foam dressing, made from hydrophilic absorbent polyurethane foam. It is soft, highly absorbent and conformable, creating the ideal environment for moist wound healing.

INDICATIONS

- Pressure ulcers
- Wounds after excision of fistulas and abscesses
- Deep wound areas, e.g. in venous leg ulcers, diabetic ulcers, trauma wounds and postoperative, dehisced wounds

BENEFITS

Cutimed® Cavity
- Especially for deep wounds with moderate to heavy exudate levels
- Atraumatic
- Non-adhesive
- Soft and conformable
- Easy to apply
- Highly absorbent
- Easy to remove

Hydrophilic absorbent polyurethane foam dressing

Please consult your sales representative for a complete list of available variants.
Cutimed® Siltec® is a foam dressing with a silicone wound contact layer and super-absorbers developed for the management of exudate and the protection of skin.

INDICATIONS
- For exuding wounds e.g.
  - Chronic wounds, such as venous, arterial or diabetic ulcers
  - Skin grafts
  - Pressure ulcers
  - Traumatic wounds
  - Skin grafts

As a secondary dressing where exudate management is required (covering products like e.g. Cutimed® Sorbact® or Cutimed® Cavity)

BENEFITS
- Silicone = Protection
- Painfree and atraumatic dressing changes
  - The perforated silicone layer ensures most gentle adherence to the skin surrounding the wound without any adhesion in the moist wound
- Best possible protection for new tissue
  - The perforated silicone layer prevents the new, fragile layer of epidermal cells which contributes to the healing process
- Fluid handling capacity
  - Reliable retention
    - Super-absorbent particles in the foam core do not only absorb a multiple of their own weight – they reliably bind exudate, even under compression. The polyurethane film on the outside of the dressing is permeable to vapours but prevents the strike-through of wound exudate
- Minimal risk of maceration
  - Vertical absorption through the polyurethane foam and the hydrophobic wound contact layer minimises the risk of macerations in the periwound skin

Cutimed® Siltec®
- Fluid handling for moderately to highly exuding wounds
  - Highly absorptive
  - 3mm thick
  - Cushioning effect

Cutimed® Siltec® L
- Fluid handling for low to moderate exudate levels
  - Moderately absorptive
  - 3mm thick
  - Highly conformable

Cutimed® Siltec® B
- Gently adhering border dressing
  - Moderately absorptive
  - All-round reliable, yet skin-friendly adherence
  - Increased border adherence

Foam dressing with a silicone wound contact layer & super-absorbers

Cutimed® Siltec Heel is designed to provide an optimal fit to every foot shape during ulcer prevention and management. Its wide surface and extra thick foam absorbs exudate from the wound bed, whilst the upper part of the especially shaped dressing, provides cushioning and pressure relief from the heel to the Achilles tendon.

INDICATIONS
- Pressure ulcers
- Diabetic foot ulcers
- Exuding wounds on heels or ankles

BENEFITS
- 7mm foam (with super-absorbers) for moderate to high exudate levels
- Reduces the risk of pressure, friction and shear
- Optimal fit for every heel shape
- Silicone wound contact layer for pain-free and atraumatic removal

The super-absorbent silicone foam dressing to fit every heel
Cutimed® Siltec Sacrum

Cutimed® Siltec Sacrum is a bordered foam dressing particularly shaped to fit the awkward sacral area, offering an extra-thick wound pad for a high absorption capacity, plus providing additional cushioning.

**INDICATIONS**
- Primary dressing for shallow pressure ulcers
- Secondary fixation on deep pressure ulcers (covering products like e.g. Cutimed® Cavity or Cutimed® Sorbact®)

**BENEFITS**
- 5mm wound pad (with super-absorbers) for moderate to high exudate levels and cushioning effect
- Wide, all-round adhering border
- Silicone wound contact layer for pain-free and atraumatic removal
- Particularly shaped to fit the sacral region
- Shape allows for secure adherence with reduced friction and shear when immobile patient is repositioned
- Available in 2 sizes

Cutisorb® Ultra

Cutisorb® Ultra is a highly absorbent wound dressing for use when regular wound dressings are not enough. The combination of innovative and new manufacturing processes ensures high exudate levels can be rapidly absorbed, bound and retained by the dressing. As a result Cutisorb® Ultra provides a new level of wound care, particularly for highly exuding wounds. In addition the risk of leakage is minimal, even under pressure.

**INDICATIONS**
- Ideal for treating highly exuding wounds e.g.
  - Chronic wounds, such as venous, arterial or diabetic ulcers
  - Pressure ulcers
  - Wounds after excision of fistulas and abscesses
  - Lymphoedema

**BENEFITS**
- 5 layer approach to innovation
  - Soft, non-woven contact layer prevents the dressing from sticking to the wound
  - Distribution layer ensures that the absorbed exudate flows evenly into the core
  - Absorbent core binds a high volume of exudate with super absorbent particles
  - Adhesive layer fixes the super-absorbent particles in place
  - Protective backing on the outer side prevents strikethrough onto clothing and bedding
- Time and cost savings with patient comfort
  - Highly absorbent
  - Reduced risk of maceration
  - Stable and tear resistant
  - Does not stick to the wound
  - Comfortable to wear
  - Less frequent dressing changes
  - Thin and flexible
  - Low risk of leakage

Cutimed® Sorbact® with its unique mode of action, has proved successful as a non-medicated antimicrobial treatment of colonised and infected wounds. Pathogenic bacteria and fungi are irreversibly bound and inactivated by the wound dressing due to a physical principle known as hydrophobic interaction.

Cutimed® Sorbact® reduces the microbial load and helps to create optimum conditions for the natural wound healing process.

INDICATIONS

For all unclean, colonised and infected exuding wounds e.g.:  
- Chronic wounds, such as venous, arterial or diabetic ulcers and pressure ulcers  
- Wounds after excision of fistulas and abscesses  
- Postoperative dehisced wounds  
- Traumatic wounds

No contraindications

No cutaneous

The efficicncy of Cutimed® Sorbact® is solely based on binding and removing wound pathogens without releasing chemically active substances that might impaire the healing process

No promotion of bacterial endotoxin release

Because, unlike e.g. silver products, Cutimed® Sorbact® does not destroy bacteria. Thus endotoxin release from dead cells is prevented, and the natural wound healing is supported

The Sorbact® method

The special coating gives the dressings their strongly hydrophobic (water-repellent) properties. Pathogenic bacteria and fungi also have hydrophobic characteristics and are irreversibly bound to and inactivated by the wound dressing through the physical principle of hydrophobic interaction.

The hydrogel impregnated Cutimed® Sorbact® gel dressing reduces the bacterial load with the tested and proved Sorbact® method while providing moist wound healing conditions.

Wound bacteria and fungi are rapidly bound and inactivated by the specially coated dressing fibres without using a chemically active agent. Cutimed® Sorbact® gel cleanses the wound from slough and necrotic tissue and promotes wound healing.

INDICATIONS

For dry to low exuding or sloughy, also necrotic wounds:

- Chronic wounds such as venous, diabetic ulcers and pressure ulcers  
- Postoperative and dehisced wounds  
- Traumatic wounds  
- Wounds after excision of fistulas and abscesses

BENEFITS

- Especially designed to bind bacteria and fungi in unclean, colonised and infected wounds which are dry or low exuding  
- Promotes autolytic debridement in sloughy or necrotic wounds  
- Creates a moist wound environment  
- Does not use any preservatives or chemically active agents

Contraindications:

- Skin infections caused by chemically active substances
- Dressing is not linked to the use of antibiotics

Disadvantages:

- Irritation in case of pre-existing allergy to ribbons or gauze

For all unclean, colonised and infected exuding wounds e.g.:

- Chronic wounds, such as venous, arterial or diabetic ulcers and pressure ulcers  
- Wounds after excision of fistulas and abscesses  
- Postoperative dehisced wounds  
- Traumatic wounds

Cutimed® Sorbact® Hydroactive is the antibacterial and antifungal dressing for all exudate levels.

**INDICATIONS**
- All contaminated, colonised or infected superficial wounds with low to high exudate levels, such as:
  - Chronic wounds, e.g. arterial, venous, diabetic and pressure ulcers
  - Postoperative dehisced wounds
  - Traumatic wounds

**BENEFITS**
- Biocompatible
- Low risk of allergies, non-irritating
- No risk of bacterial or fungal resistance
- No cytotoxicity
- Cushions and protects the wound
- Does not stick to the wound
- Atraumatic, painless dressing changes
- Supports moist wound healing
- Prevents maceration, permeable to water vapour
- Absorbs and locks wound exudate in the hydropolymer core
- Absorbs and locks wound exudate in the hydropolymer core
- Active antifungal mode of action
- Highly absorbent hydropolymer matrix
- Antibacterial Sorbact® mesh
- Highly absorbent polymer gel core

---

Cutimed® Sorbact® Hydroactive & Cutimed® Epigraft

With Cutimed® Epigraft you apply a breathable medium to the wound, stabilising it while shielding it from harmful environmental factors. This enables Cutimed® Epigraft to significantly reduce the healing time.

New epithelium re-grows faster and shortens the customary intervals between first and second harvest when used for split-thickness skin grafts. Quicker re-harvesting allows more wound area (e.g. burns) to be closed up in a shorter time. Subsequently, patients can be released from ICUs sooner and regain mobility faster.

**INDICATIONS**
- Split-thickness skin grafts
- Category 2a/2b burns
- Wounds with characteristics comparable to split-thickness skin graft sites

**BENEFITS**
- Very thin: easy to handle
- No secondary fixation required
- One application only
- No secondary fixation required
- Combination with other products possible

**ORDERING INFORMATION**

Cutimed® Gel is a clear, amorphous hydrogel for the treatment of necrotic and sloughy tissue in wounds and for the donation of moisture to dry wounds.

**INDICATIONS**

- Supports autolytic debridement in necrotic and sloughy wounds
- Provides moisture to dry wounds, even in later stages of wound healing

**BENEFITS**

- Pure formulation: there is less risk of an allergic reaction as Cutimed® Gel is preservative-free
- Compatible with secondary dressings: Cutimed® Gel can be covered with any type of secondary dressing, e.g., film dressings
- Superior moisture donation allows for less frequent dressing changes and effective debridement

Leukosan® Adhesive condenses all advantages of conventional skin adhesives into an innovative aluminium tube. Its highly viscous and quick setting cyanoacrylate adds major improvements to the benefit of patient and practitioner. Leukosan® Adhesive represents a well-composed wound closure concept, offering a leading option for precise wound closure procedures.

**INDICATIONS**

- Closure of topical incisions, cuts and lacerations with little or no tension, ideal in the operating theatre or in the emergency department
- Wounds in problem areas where flexing occurs (between fingers or toes, on elbows or knees)
- Additional infection control on incisions and lacerations closed with sutures, strips or staples
- Topical closure of deeper wounds after prior use of subcuticular sutures

**BENEFITS**

- Ultra-high viscosity
  - Quick, easy and safe to apply
  - 1 Layer is sufficient
- Action flexibility
  -Flexes with skin
  - Reliable adaption and protection
- Express polymerisation
  - Quick wound closure
  - Lasting adaption
- Low exothermic reaction
  - Pain-free
  - Patient comfort
  - Child-friendly
- Two applicator tips
  - Optional precise and/or protective application
- Easy-to-handle aluminium tube
  - For maximal control
  - Prevents sucking contaminants back into the tube
- Slightly violet dyed, transparent once on skin
  - Facilitates application as the practitioner can see where it goes
  - Invisible wound closure and protection
Leukosan® SkinLink

Leukosan® SkinLink is an innovative wound closure system that will make a critical difference to many medical procedures. SkinLink is a patented technology that combines wound strips with a topical adhesive.

INDICATIONS

- Lacerations and cuts
- Traumatic injuries
- Surgical incisions
- Minor cosmetic surgery
- Laparoscopic procedures

BENEFITS

- Reliable topical wound closure
- Less time-consuming than suturing
- Avoids additional trauma to the wound
- Less skill-intensive than suturing
- Requires no local anaesthetic
- Removes the stress of the stitching process, particularly for children, or the elderly with their fragile skin
- No need to remove stitches
- No risk of infection via migration of the bacteria down the suture line
- Reduced risk of needle stick injuries
- Easy to learn application technique

Leukosan® Strip

Wound closure strips have become a popular option for topical applications. Their prevalent benefits include atraumatic, painless application, low infection risk and good cosmetic results. Thanks to its knitted elastic fabric, Leukosan® Strip represents the latest development, adding yet more benefits to the list.

INDICATIONS

- Leukosan® Strip is ideal for closing facial lacerations or incisions without additional trauma and best cosmetic results
- For use on thin, fragile or sensitive skin
- Additional tension relief for wounds closed with intracutaneous sutures

BENEFITS

General benefits at a glance:

- Atraumatic, pain-free application
- Tension-free adaptation of wound edges
- Good cosmetic results
- Low infection risk
- Excellent tolerance
- Breathable fabric prevents maceration
- Sterile

Additional benefits Leukosan® Strip:

- Intelligent threads
  - Curved polyamide threads enable strips to expand and retract. This feature allows strips to adapt to oedema-caused expansion of wound tissue while avoiding constriction

- Fray-protected
  - Rounded edges prevent material from fraying or rolling up and assure durability of strips thus minimising aftercare

- Reliable adhesion
  - The permeable fabric allows the skin to breathe and moisture to escape
  - The strong, yet skin-friendly adhesive keeps the strips securely in place

- Durability
  - Minimises aftercare

Leukosan® SkinStapler & Remover

Skin staplers are fast, efficient and easy to handle, they are a very effective tool for topical wound closure. The Leukosan® SkinStapler has been engineered to be significantly more user-friendly while securing superior results.

INDICATIONS

• Orthopaedics: knee replacement
• Gynaecology: laparotomy
• Emergency room: scalp lacerations
• Head and neck surgery: thyroidectomy
• Phlebology: vein stripping
• Plastic & reconstructive surgery: skin grafts

BENEFITS

The power of Leukosan® SkinStapler:
• Excellent view of stapling area
• Ergonomic design for secure grip
• Solid construction
• Transparent staple magazine with indicator
• Patented automatic staple release – no double-feeding
• Single use
• Single packed in sterile peel blister (EO)
• Preloaded with 35 wide D-staples

Enhanced details of Leukosan® SkinStapler:
• Solid construction
• No wigging handles, no jarring, no double-feeding
• All parts fit precisely – for precise procedures

Ergonomic design
• Anti-slip grooves on handles ensure good, secure fit in hand
• The Leukosan® SkinStapler is designed to fit all hand sizes

Superior visibility
• Leukosan® SkinStapler offers superior wound site visibility thanks to the design of the instrument head resulting in improved handling and more precise positioning of staples

Cuticell® Classic is a low-adherent wound contact layer, made of open weave cotton gauze impregnated with soft paraffin. Facilitates dressing changes and supports a moist wound environment.

INDICATIONS

For exuding wounds such as:
• First and second-degree burns
• Lacerations and abrasions
• Leg ulcers
• Donor and recipient skin graft sites

BENEFITS

Impregnated with soft paraffin
• Low adherence to wound bed and helps to maintain a moist environment to support wound healing

Interlocking weave gauze fabric
• Increases stability when cut to size
• Prevents fraying

Permeable to air and exudate
• Allows exudate to drain freely into an absorbent secondary dressing
• Prevents occlusive effects

Leukomed®

All-round suitability for wound dressing
• Non-adherent polypropylene layer prevents the pad from sticking to the wound
• Leaves wound undisturbed

Highly absorbent
• Air and water vapour permeable, Leukomed® is extremely skin-friendly

Reduces risk of maceration
• The viscose fleece wound pad ensures reliable absorption of secretions, prolonging the intervals between dressing changes
• Leaves no residue when removed
• Rounded edges prevent the dressing from curling off
• Comes in seven handy sizes
• Available in two pack sizes

LEUKOMED® - Non-Woven Sterile Wound Dressing with Absorbent Pad

A skin friendly, conformable and smooth sterile wound dressing with a highly absorbent, non-adherent wound pad.

INDICATIONS
• For surgical wounds
• After injuries (cuts, grazes, etc)

BENEFITS
Wound protection
• Leukomed® is sterilised, individually sealed and reliably covers the wound
• Suitable for all skin types

Skin-friendly yet strong adhesive
• Applied in an intelligent pattern (“pattern coat”)

Highly absorbent
• Increases patient mobilisation
• Allows secure fixation and lasting protection without impairing breathability

Reduces risk of maceration
• Reduces risk of maceration

All-round suitability for wound dressing
• Leukomed® is radiograph transparent
• Ease of use, for quick dressing changes
• Leaves no residue when removed
• Rounded edges prevent the dressing from curling off
• Comes in seven handy sizes
• Available in two pack sizes

LEUKOMED® T - Transparent, Waterproof Sterile Wound Dressing

A transparent and conformable wound dressing for reliable protection from water and bacteria.

INDICATIONS
• For covering non-secreting wounds, protecting them from friction and shear
• For waterproof fixation of cannulae, compresses and intravenous catheters (peripheral or central)

BENEFITS
Effective protection from water and bacteria
• Leukomed® T is sterilised, individually sealed and reliably covers the wound
• The transparent polyurethane film of Leukomed® T is both waterproof and bacteria proof

Thin, soft and flexible film
• Conformable to body contours and devices
• Helps prevent tension blisters
• High moisture vapour transmission rate (MVTR) means reduced risk of maceration

Skin-friendly yet strong adhesive
• Applied in an intelligent pattern (“pattern coat”)
• Allows secure fixation and lasting protection without impairing breathability

Reduces risk of maceration
• Increases patient mobilisation
• Leukomed® T allows the patient to shower or bathe

All-round suitability for covering non-secreting wounds
• Leukomed® T is radiograph transparent
• Backing film with handling tape, allows for safe and accurate application
• Rounded edges prevent the dressing from curling off
• Leaves no residue when removed
• Comes in seven handy sizes
• Available in two pack sizes

Leukomed® T
Leukomed® T plus

A transparent, conformable and absorbent wound dressing for reliable protection from water and bacteria.

**INDICATIONS**
- For surgical wounds
- After injuries (cuts, grazes, etc.)
- For protecting wounds during hydrotherapy and bathing

**BENEFITS**
- Effective protection against water and bacteria
- Leukomed® T plus is sterilised, individually sealed and reliably covers the wound
- The transparent polyurethane film of Leukomed® T plus is both waterproof and bacteria proof
- Thin, soft and flexible film
- Conformable to body contours and devices
- Helps prevent tension blisters
- High moisture vapour transmission rate (MVTR) means reduced risk of maceration
- Skin-friendly yet strong adhesive
- Applied in an intelligent pattern (“pattern coat”)
- Skin-friendly yet strong adhesive
- Available in two pack sizes
- Comes in seven handy sizes
- Leaves no residue when removed
- Rounded edges prevent the dressing from curling off
- Film is breathable and permeable to water vapour thereby reducing maceration
- Film protects the puncture site from water and bacteria
- Completely transparent - puncture site can be visually inspected at all times
- Film is breathable and permeable to water vapour thereby reducing maceration
- Rounded edges prevent film from rolling off at edges
- Comfortable to wear due to stretchable film
- Reliable adhesive power provides good catheter security, but easy to remove
- Unique application system makes the product easy and quick to use

**APPLICATION METHODS**
- Sandwich
  - Central line, 2-3 lines - jugular, sub-clavian, femoral
  - Dialysis catheter - haemodialysis, peritoneal dialysis
- Standard
  - Central line, single line
  - Port-A-Cath
- Envelope
  - Central line catheter, 2-3 lines - jugular, sub-clavian, femoral
  - Peripheral catheter - maximum stability
  - Peridural catheter - maximum stability
  - Arterial catheter

Leukomed® I.V. film

Transparent, conformable, bacteria and waterproof film for secure and reliable fixation of catheters and cannulae.

**INDICATIONS**
- For fixation of central and peripheral catheters and cannulae.

**BENEFITS**
- Includes fixation strips to assist application
- High level of therapeutic reliability for patient and users
- Sterile packaging facilitates aseptic technique
- Film protects the puncture site from water and bacteria
- Completely transparent - puncture site can be visually inspected at all times
- Film is breathable and permeable to water vapour thereby reducing maceration
- Rounded edges prevent film from rolling off at edges
- Comfortable to wear due to stretchable film
- Reliable adhesive power provides good catheter security, but easy to remove

**Wound Dressings**

Low cost wound dressings for a variety of woundcare requirements.

**INDICATIONS**
- Primary dressing in exuding wounds
- Secondary dressings
- Skin protection
- Temporary incontinence

**BENEFITS**

- **Cutisoft® Burns Dressing**
  - 16-Ply gauze dressings, used in treatment of large wound sites

- **Cutisorb® Absorbent Dressing Pads**
  - Excellent absorption properties
  - Good padding effect
  - Soft, conformable and comfortable
  - Superior quality cotton fibres
  - SANS compliant
  - Cost-effective wound management

- **Surgipak® Low-adherent Dressing**
  - Low-adherent dressing without strike-through protection, for quick wicking action through to secondary dressing

**Cutisoft® Burns Dressing**

- **Cutisoft® Burns Dressing**
- **Cutisorb® Absorbent Dressing Pads**
- **Surgipak® Low-adherent Dressing**

**Cutisoft® Burns Dressing**

- Skin protection
- Secondary dressings
- Primary dressing in exuding wounds

**INDICATIONS**

- Skin peeling
- Wound cleansing
- General cleansing
- Primary / secondary dressing

**BENEFITS**

- Quality assured SANS 446 compliant
- Highly absorbent 100% pure cotton
- Wide range of sizes and plies
- Available in Plain, Blue, Green, X-Ray and Tied 5

**Cutisoft® Gauze Swabs**

- 100% Pure cotton woven swabs for use in any hospital procedure

**Cutisoft® Specialised Theatre Swabs**

Safe and suitable for all areas of clinical practice.

**INDICATIONS**
- Absorption of body fluids during operations
- Jagged bone protection
- Body cavity packing
- Organ manipulation and protection
- Plugging purposes

**BENEFITS**
- Made from the highest standard materials
- SANS compliant
- Highly absorbent 100% pure cotton
- X-Ray detectable thread for reliable detection
- Tied range

**Cutisoft® Swabs**
- Natural Theatre Swabs - X-Ray Detectable
- Safe and suitable for all areas of clinical practice

**Cutisoft® Swabs**
- Tonsil Swabs - X-Ray Detectable
- Specialised swabs for tonsillectomies

**Cutisoft® Swabs**
- Dissecting Swabs - X-Ray Detectable
- For use during intricate theatre procedures, e.g. neurosurgery

**ALSO AVAILABLE IN STERILE VARIANTS**

**High performance 100% cotton, X-ray abdominal swab.**

**INDICATIONS**
- SANS 443 approved material meet all the criteria for operating theatre procedures and standards.

**BENEFITS**
- Quality assured SANS 443 compliant
- Woven cotton abdominal swabs
- 100% absorbent bleached and purified cotton gauze
- All edges folded and sewn with cotton yarn ensuring no loose edges
- Cost-effective competitive price
- Conforms to demanding quality standards

**Cutisoft® Swabs**
- Premium Abdominal Swabs
- SANS 443 compliant
- X-Ray detectable thread with Blue Tapes

**Cutisoft® Swabs**
- Super Plus Abdominal Swabs
- Super Plus is manufactured with a 50% thicker thread for improved absorbency and unrivalled standard of capacity
- Super Plus 4-ply is the most cost-effective swab available, yet still conforms to the most demanding quality control standards and outperforms the standard 6-ply swabs, at a more competitive price
- Promotes both initial “flash” absorption and sustained drawing of fluids, up and away from the wound site
- Easy identification - Green Tape

**CUTISOFT® Abdominal Swabs**

High performance, 100% pure cotton abdominal swabs
A range of quality sundries you can rely on.

### INDICATIONS
- Skin prepping
- Dressing
- Skin protection
- Absorption

### BENEFITS
- Excellent absorption properties
- Good padding effect
- Soft, conformable and comfortable
- Superior quality cotton fibres
- SANS compliant
- Cost-effective wound management

**Cutisoft® Universal Plugs**
Vaginal tampons ideal for post-childbirth or gynaecological dressing.

**Cutisoft® Eye Pads**
- High Absorbency
- Soft
- Conformable
- Comfortable

**Cutisoft® Cotton Wool**
Rolls are ideally suited for general hospital use. Cotton wool balls are used for swabbing and prepping purposes.
- Superior quality cotton fibres
- SANS compliant
- White, soft
- Highly absorbent

### BENEFITS
- Absorption
- Skin protection
- Dressing
- Skin prepping

**INDICATIONS**
A range of quality sundries you can rely on.

**Cutisoft® Sundries**

**Cutisoft® Gauze**

- High quality, light, gauze for treatment of large wound sites and cavity plugging.

### INDICATIONS
- Large wound areas
- Burns
- Swab and bandage application
- Cavity plugging

### BENEFITS
- Light inexpensive gauze dressing
- SANS 446 compliant
- White 100% high quality pure cotton
- Soft and comfortable
- High degree of absorbency
- Woven and lint-free

**Cutisoft® Gauze – Naturil Gauze Rolls**
High quality cotton gauze that can be used for a wide variety of swab and bandage applications.
- 90cm four folded width
- X-ray detectable rolls can be used for CSSD manufactured theatre swabs

**Cutisoft® Ribbon Gauze**
- High quality gauze, with no loose edges, used mainly for cavity plugging

**Also available in sterile variants.**
**Dr White's®**

Dr White's® sanitary towels contain a special blend of highly absorbent materials for post-natal care, normal and heavy menstruation.

**INDICATIONS**

- Maternity and post delivery
- Normal and heavy menstruation

**BENEFITS**

- In excess of SANS specifications
- Maximum absorption capacity and fluid retention
- Backing layer to prevent strike-through
- Available with and without loops
- Regular & maternity sizes
- Steam sterilisable

**Dr White's® with polyshield**

Dr White's® with polyshield has been specifically designed for the first six hours after delivery.

**INDICATIONS**

- Maternity
- Post delivery

**BENEFITS**

- Fewer pad & sheet changes
- Labour saving
- Cost effective
- Won't drag on sutures
- Prevents strike-through

**Promask®**

Promask® is the ultimate face mask which allows you supreme comfort with a constant bacterial filtration (BFE) of above 80%.

**INDICATIONS**

- It is ideal for use in surgical procedures, and by vets and dentists
- Promask® is also suitable for barrier nursing

**BENEFITS**

- Non-fibreglass to avoid allergic reactions
- High breathability, yet safe
- Mouldable nose clamp for added wearer comfort and infection control
- Three layer mask for superior protection
- Non-scratch nose piece

**Queen Charlotte®**

Queen Charlotte® face masks have been the industry standard in deflection face masks for many years. They are manufactured from 2-ply paper and have a 67% BFE for up to 3 minutes.

**INDICATIONS**

Ideal for barrier nursing and industrial use.

**BENEFITS**

- Inexpensive
- Easy to don and comfortable to wear
- 2-ply paper filtration medium
- Minimal blow-by

Histofreezer®

The ultimate in convenience, Histofreezer® combines the efficacy of traditional cryosurgery with practical aerosol technology.

INDICATIONS
• Verruca Vulgaris (Common warts)
• Condyloma Acuminata (Viral warts)
• Verruca Planar
• Acrochordon (Skin tags)
• Lentigo (Age spots)
• Actinic Keratosis
• Verruca Plantaris (warts on the sole)
• Seborrhoeic Keratosis
• Mollusca Contagiosa

BENEFITS
Convenience
• Compact storage
• 3 year shelf life
• New disposable applicators in two sizes, for more accurate application

Economy
• Low cost per treatment
• No waste through evaporation
• Quick in-office procedure (20 - 40 seconds)

Patient Comfort
• No anaesthesia, sutures or dressings
• Odourless

Safety
• Less trauma
• Less scarring and depigmentation

Effectiveness
• Just as effective as liquid nitrogen

Dynasport® Thermal

Dynasport® is used by top international sportsmen and women around the world. This technologically advanced range of Thermal products is ideal for the effective prevention and treatment of sports injuries.

INDICATIONS
For use on minor joint, ligament and muscle injuries where the body's own heat is used to remedy the injury.

BENEFITS
• Available in different sizes for ankles, elbows, wrists, thighs and knees
• Ideal for use during any exercise or while playing sport
• Perfect for treating ‘day-after’ aches and pains
• Long-lasting and fully washable, maintaining its shape even after repeated use and washing
• Used to ease pain and reduce swelling caused by knocks and bruises, without irritating or chafing the skin

**Actimove® Genu / Actimove® PTKD (Knee Immobilisers)**

The convenient stabilisation systems for the knee and ankle joints in a comfortable way after acute injury or surgical interventions.

**INDICATIONS**

**Actimove® Genu**
- Tri-panel Knee Immobiliser
  - Following surgery, soft tissue injuries and minor fractures in the knee region

**Actimove® PTKD**
- Post-Trauma Knee Dressing
  - Replaces the multi-layer bandages system used for the traditional “Jones’ Dressing”
  - Ideal after arthroscopic interventions or trauma at the knee

**BENEFITS**

**Actimove® Genu**
- Panels allow splint adjustments for a broad spectrum of patient leg circumferences
- Hook and loop sensitive closure system permits an easy application and removal
- Removable and adjustable aluminium stays allow good anatomical fit
- Terry cloth interior padding for patient comfort
- Splint is washable for additional patient hygiene

**Actimove® PTKD**
- Provides compression and moderate support
- Unique anatomical shape
- Saves time and money
- Hygienic

**Actimove® GenuMotion (Knee Support)**

Actimove® GenuMotion knee support features an innovative knitted structure combining excellent fit with graduating compression to promote improved blood circulation and lymphatic flow for better pain relief.

**INDICATIONS**

- All types of gonarthrosis
- Minor instabilities of the knee joint
- Minor injuries of the meniscus
- Weak ligaments in the knee joint area
- Postoperative care, e.g. after knee arthroscopy
- Acute inflammation of the joint

**BENEFITS**

**Comfort**
- Pressure-free cuffs eliminate constriction
- Specially designed Motion Comfort Zone in the popliteal area
- 3D anatomic fit for optimum, long-lasting support and comfort
- Highly breathable and moisture-absorbent fabric for dry, perspiration-free skin

**Stabilisation**
- Increased stability for maximum safety while moving the knee
- Highly elastic insert massages the patella and promotes the reduction of swelling
- Anatomically integrated spiral stays support a natural gait
- Highest therapeutic compression and optimal comfort

**Design**
- Asymmetric helix design for self-explanatory positioning
- New visual concept communicating dynamic flexibility
- Easy-to-wear support enhances patient compliance

The convenient stabilisation systems for the knee and ankle joints in a comfortable way after acute injury or surgical interventions.

**INDICATIONS**
- Severe and moderate acute lateral ankle sprains
- Post-operative ankle injuries
- Malleolar fractures in the rehabilitative phase

**BENEFITS**
- Lightweight but strong plastic shells
- Less risk for pressure points due to:
  - Asymmetrical medial and lateral shells that follow the anatomical contours of the ankle
  - Large malleolar indentation
- Secure fit: straps with D-rings allow close, precise placement and effective stability
- The interior foam padding offers the patient good wearing comfort
- The foam can be easily removed and washed for better hygiene

**Actimove® TaloCast-Air (Ankle Brace)**

Functional ankle brace combines benefits for effective therapy and improved compliance.

**INDICATIONS**
- Acute capsular ligament injuries (ankle sprains)
- Ankle strains
- Chronic ankle instability

**Actimove® TaloCast-Air can also be used for preventative bracing and post cast support.**

**BENEFITS**
- Cushioning comfort
  - Air cells prefilled at optimal level
  - Air cells can be individually adjusted for customised fit
  - Free air flow inside air cells creates a massage effect reducing swelling
  - Cushioning double-layer foam inlay for enhanced wearing comfort
- Secure stabilisation
  - Semi-rigid, lightweight shells for the right balance of stabilisation and mobility supporting a quick recovery
  - High-quality durable heel pad provides a strong and tight fit
  - 360° surround straps give secure support
- Sleek and slim design
  - Anatomically shaped low profile shells fit comfortably in everyday footwear enabling patients to quickly return to normal activity
  - Flat head rivets and seamless welding technology for a slim look
  - Sleek and modern black & blue design for enhanced patient compliance
- Ease of use
  - Easily adjustable heel pad with hook and loop closure system on the outside of shell
  - The heel pad’s printed foot symbol ensures correct application
  - Shells can be cleaned easily with a damp cloth

Actimove® TaloCast-AirGel (Ankle Brace)

The convenient stabilisation systems for the knee and ankle joints in a comfortable way after acute injury or surgical interventions.

INDICATIONS

• Acute capsular ligament injuries (ankle sprains)
• Ankle strains
• Chronic ankle instability
• Swelling and edema at the ankle

BENEFITS

Relieving cooling therapy
• Integrated cooling gel pads effectively help to reduce swelling, edema and pain, promoting the healing process
• Gel pads can be easily and quickly cooled in the freezer

Cushioning comfort
• Gel pads adapt to the anatomical form of the ankle to provide comfortable cushioning
• Prefilled air cells can be individually adjusted for customised fit
• Free air flow inside air cells creates a massaging effect helping to reduce swelling

Increased stabilisation
• Semi-rigid, lightweight shells with gel pads give increased stabilisation
• High-quality durable heel pad provides a strong and tight fit
• 360° surround straps provide secure support

Sleek and slim design
• Anatomically shaped low profile shells fit comfortably in everyday footwear
• Flat head rivets and seamless welding technology for a slim look
• Sleek and modern black & blue design for enhanced patient compliance

Ease of use
• Easily adjustable heel pad with hook and loop closure on the outside of shells
• The heel pad's printed foot symbol ensures correct application
• Shells can be cleaned easily with a damp cloth

Actimove® TaloMotion ankle support features an advanced knitted structure combining optimal therapeutic compression, stability and comfort. It promotes improved blood circulation and lymphatic flow, reducing local edemas and swelling for better pain relief.

INDICATIONS

• Postoperative or post-traumatic irritation
• Joint effusions and swelling
• Arthritis and arthrosis
• Tendomyopathies
• Slight ligamental instabilities

BENEFITS

Stabilisation
• Optimal gradient compression promotes the healing process
• Anatomically shaped inserts for targeted pressure and pain relief
• Improved stability for maximum safety while moving the ankle

Comfort
• Specially designed heel area for enhanced stability
• Pressure-free cuffs eliminate constriction
• Highly breathable and moisture absorbent fabric for dry, penetration-free skin
• Seamless terry cloth liner for cotton-like softness and maximum comfort
• 3D anatomic fit for enduring comfort and strong support

Design
• Dynamic helix design communicating flexibility and function
• Makes it easy to understand how to position the bandage
• Attractive colour selection enhances patient compliance

Actimove® StepLite (Braces & Immobilisers)

The Actimove® StepLite heel cushions with their anatomical shape and embedded soft BlueSpot efficiently reduce pressure and pain. Easy to fit and use, they have been specially designed to give an exceptional feeling of stabilisation and comfort ensuring improved compliance and a smooth healing process.

INDICATIONS

- Plantar fasciitis
- Calcaneal spur
- Pain in the achilles tendon
- Compensates for a difference in leg lengths of 1cm

BENEFITS

- Effective healing process
  - Wedge shaped profile leads to efficient pressure reduction in the heel area
  - Embedded BlueSpot provides effective pain relief for the most sensitive area of the heel
  - Provides excellent shock absorption even during high impact sporting activity and for overweight patients
  - Enables patients to quickly get on with their daily life

Sleek anatomical shape

- Comfortably aligns to the natural shape of the heel
- Slim design fits neatly into most shoes

Comfortable and secure

- Provides good bonding inside the shoe to ensure a secure fit
- Non-slip surface
- Made from medical grade, odourless silicone reducing the risk of allergic reactions
- Can be cleaned easily by hand in lukewarm water

Anatomically shaped heel cushions

Actimove® EpiMotion (Elbow Support)

Actimove® EpiMotion elbow support features an innovative knitted structure combining excellent fit with optimised targeted compression. It promotes improved blood circulation and lymphatic flow, reducing local edemas and swelling for better pain relief.

INDICATIONS

- Epicondylopathies e.g. tennis or golfer’s elbow
- Degenerative changes of the elbow (osteoarthritis)
- Joint inflammation (arthritis)
- Postoperative or post-traumatic irritation
- Tendomyopathies

BENEFITS

- Stabilisation
  - Highly effective therapeutic compression promotes the healing process
  - Anatomically shaped inserts for targeted pressure and pain relief
  - Improved stability for maximum safety while moving the elbow

- Comfort
  - 3D anatomic fit for optimum support and comfort
  - Inserts with epicondyle cut-outs facilitate correct positioning
  - Pressure-free cuffs eliminate constriction
  - Highly breathable and moisture absorbent fabric for dry, perspiration-free skin
  - Seamless terry cloth liner for cotton-like softness and maximum comfort
  - Specially designed Motion Comfort Zone in the elbow crease area giving an almost pressure-free, comfortable fit

- Design
  - Dynamic helix design communicating flexibility and function
  - Makes it easy to understand how to position the bandage
  - Attractive colour selection enhances patient compliance

Actimove® EpiSport (Elbow Brace)

Actimove® EpiSport is a specially designed Elbow Brace made from elastic, flexible, durable and latex free material. Actimove® EpiSport reduces discomfort and pain caused by any kind of acute and chronic Epicondylitis. It features systematically combined benefits for improved compliance and mobility.

**INDICATIONS**
- Acute and chronic Epicondylitis radialis humeri (Tennis elbow)
- Acute and chronic Epicondylitis ulnaris (Golfer elbow)
- Problems caused by repetitive use of the wrist and forearm

**BENEFITS**
- Enhanced comfort
  - Provides targeted dual compression for quick pain relief
  - Anatomically correct design aligns to the natural shape of the elbow
  - Ensures an optimal fit and relieves pressure of affected muscles
  - Elastic strap prevents blood constriction
  - Reduces discomfort and pain

- Easy handling
  - Non-slip and soft cushioning inner liner ensures optimal fit
  - Thin peltts with buckle closure and elastic Velcro straps allow individual therapeutic compression levels and easy handling
  - Can be cleaned easily by hand in lukewarm water

- Good compliance
  - Sleek anatomic design, comfort and ease of use
  - Can be worn under all sorts of shirts without piling up
  - Enables your patients to quickly rejoin in their favorite sports

Actimove® ManuMotion (Wrist Support)

Actimove® ManuMotion wrist support features an innovative knitted structure that delivers targeted compression and softness in the Motion Comfort Zone around the thumb. It includes a smart, slip-on design that makes it easy for patients to take their product on and off with just one hand, and adjustable diagonal thumb straps for more effective stabilisation.

**INDICATIONS**
- Arthritis, rheumatoid arthritis
- Tendovaginitis
- Tendomyopathy, Tendopathy
- Post-OP
- Irritations of soft tissue
- Distortion, Contusion

**BENEFITS**
- Advanced knitted structure for targeted compression
  - Moldable stay stabilises the wrist in a functional position and supports pain relief
  - Dorsal pressure pad supports the natural lymph flow and helps reduce swelling
  - Especially soft Motion Comfort Zone in the thumb area for high wearing comfort
  - Inelastic wrist band for additional wrist stabilisation

Actimove® (Braces & Immobilisers)

The convenient immobilisation systems for the upper extremity.

**INDICATIONS**

**Actimove® Manus**
ECO Wrist Brace
- Inflammatory conditions, soft tissue injuries and overuse injuries

**Actimove® Umerus**
Comfort Shoulder Immobiliser
- For use following shoulder surgery, fractures and surrounding soft tissue injuries

**Actimove® Sling**
Arm Sling
- Trauma at wrist, elbow or shoulder
- Arm support in combination with a cast

**BENEFITS**

**Actimove® Manus**
ECO Wrist Brace
- Complete coverage of the dorsum of the hand towards the knuckles
- Design shaped to allow full function of the metacarpal joints
- Brace length according to size
- Width of aluminium support according to brace size
- Removable and adjustable aluminium stay

**Actimove® Umerus**
Comfort Shoulder Immobiliser
- Integrated neck pad provides additional patient comfort
- Adjustable neck and waist strap, with Y-tab hook system, facilitates secure clinical positioning
- Elbow mobilisation is possible without complete sling removal
- Waist strap attachment is designed to allow full wrist mobility
- Soft thumb loop effectively maintains sling placement

**Actimove® Sling**
Arm Sling
- Stretch-resistant foam keeps the arm in position
- Y-tab hook fasteners allow easy position adjustments of the arm
- The strap width remains constant during use, which guarantees less compression in the neck

Comfortable and easy to wear support systems for the cervical, intra-abdominal and lumbal regions.

**INDICATIONS**

**Actimove® Cervical**
Cervical Collar
- Acute neck injuries or for chronic cervical syndromes

**Actimove® Lumbal**
Lumbar Support / Lower Back Support
- Low back pain, sprains and strains

**BENEFITS**

**Actimove® Cervical**
Cervical Collar
- Medium foam density for medium support and optimal comfort
- Firm foam density for increased support
- Pre-shaped foam for anatomical fit
- Cotton cover for patient comfort
- Additional, washable stockinette for collar cleanliness
- Wide overlap of the hook, loop sensitive closure system and 6 different heights permit usage on a wide range of neck sizes

**Actimove® Lumbal**
Lumbar Support / Lower Back Support
- Comfortable elastic fabric
- Built-in lumbar pocket to insert rigid support
- Comfortable terry cloth neoprene pad on the inside
- Side pulls provide a close fit and additional support in the lumbar area

**Paragon (Adhesive Felt)**

Adhesive felts for use in orthopaedic and chiropody.

**INDICATIONS**
- For use in areas where extra cushioning is required
- For protecting bony prominences before applying undercast padding, and a cast

**BENEFITS**
- Paragon Felt is semi-compressed, offering superior cushioning
- Can be cut to required size, ideal for use in any body part

Finest surgical quality, semi-compressed and spread with zinc oxide adhesive

---

**Soffban® Natural**

100% Viscose / hypo-allergenic orthopaedic padding.

**INDICATIONS**
- For use underneath a cast (POP or synthetic), to provide good cushioning and patient protection

**BENEFITS**
- Facilitates setting time by drawing water from the POP during the cast application
- For use as a secondary absorbent dressing for exuding wounds due to its high level of absorbency

Conformable
- Soffban® has excellent conformability, ensuring easy application and a smoother finished cast

Easy to tear
- Soffban® tears apart easily, helping conformability and easy application, reducing the risk of stressing the fracture when finishing padding application

Paper-wrapped
- Soffban® is now paper-wrapped, making it more convenient for autoclaving and reducing the amount of plastic used in packaging

Autoclavable
- Soffban® is autoclavable without removing its wrapper. It can be used for any procedures where sterility is required

100% Viscose / Hypo-allergenic
- Minimises risks of allergic reactions

**Velband® Orthopaedic**

**INDICATIONS**
- For use as undercast padding, under Plaster of Paris or Synthetic casts

**BENEFITS**
- Velband® and Velband® Sterile are hypoallergenic bandages with a unique three-layer structure for easy application and long-term comfort
- Provides excellent cushioning and moisture management under Plaster of Paris or Synthetic casts, avoiding irritation and pressure sores by keeping skin dry and comfortable
- The high level of absorbency provides an indication for use as a secondary absorbent dressing for exuding wounds
- Good wicking action which draws water from the Plaster of Paris bandages during application and facilitates the setting time
- Easy to handle and remove and is autoclavable for theatre use
- Velband® is also available in a double wrapped sterile version

Delta-Dry®

The padding that fits your lifestyle

INDICATIONS

- Primary and secondary casting
- Rigid support

BENEFITS

- Knit technology with synthetic fibre make-up:
  - Polypropylene (53%)
  - Nylon (47%)
- Allows any liquid to quickly run-out of the cast
- Tramlines
  - Create more surface area for optimal adhesive cling
  - Aid application by providing reference lines for overlapping padding by 50%
  - Apply adhesive away from the patient’s skin to secure the padding as it is wrapped
- Designed to provide cushioning under any cast, providing comfort, protection and convenience to the patient

The best solution, especially for patients wearing a synthetic cast:

- Less disruption in lifestyle
- Allows the patient to shower, bathe and swim as normal
- Water resistant - allows water to pass through

Delta-Net® Stockinette (Fracture Management)

Polyester and cotton undercast padding, for a neat finished cast.

INDICATIONS

To provide a first layer in contact with the skin before applying undercast padding.

BENEFITS

- Comfortable and skin friendly
- A neat finished cast around the edges
- Highly absorbent to keep the skin dry
- Autoclavable
- Stretches twice to its width (ribbed)
- Allows greater conformability with improved comfort
- Convenient packaging dispenser keeps product clean, neat and ready for application

**Tensoplast® Skin Traction Kits**

STK’s are devised to provide an efficient and reliable support system, enabling suitable traction weights to be applied to a limb. The kit is easy to use and adaptable to any technique of limb skin traction.

**INDICATIONS**
- To restore alignment following a fracture
- To relieve muscle spasm or pain
- For less severe trauma where soft tissues damage is minor
- Where the injuries present no hazard of bone infection
- Post O.R.I.F, for enhanced healing

**BENEFITS**
- Non-adhesive STK
  - High quality components - one kit for entire traction period
  - Good skin friction characteristics
  - High conformability for easy application
  - High performance elastic bandage for extra security
  - Non-adhesive traction kit for children
  - Weights of 7-10 kilos may be safely used

**Low Allergy Adhesive STK**
- Low allergy adhesive - ideal for sensitive soft tissue
- Excellent conformability for easy application
- Reliable and secure
- High performance compression bandage for extra security

**CryCoat™ Blade**
**The Cool Cutting Solution**

**BENEFITS**

- CryCoat™ Blade is a unique, special treated blade which does not heat up as quickly or intensely as other blades do.
- Less heat gives you and your patients more protection from thermal injury when removing a fibreglass, polyester cast and thermoplastics. Due to its extraordinary top performance, it collects dust very well.
- Small, ergonomic, light handpiece Delta-Cast® Saw is small, light and perfectly balanced for easy handling. The softer and more comfortable grip area enables the operator to use the saw with one hand only (left or right hand).
- Unique cryo coated blade CryCoat™ Blade is a uniquely treated stainless steel blade which does not build up heat quickly. The blade can be easily accessed and changed. CryCoat™ Blade allows six rotations.

The tried and trusted Gypsona® formula with rich and creamy texture results in easy handling and smooth mouldability.

**INDICATIONS**
- Splinting of all types of fractures, acute and secondary conditions
- Immobilisation of diseased bones and joints
- Negative and positive casting techniques
- Emergency splinting
- Available in rolls and slabs to cater for various cast applications

**BENEFITS**
- Interlocking weave allows conformability and minimises the narrowing of the cloth when wet
- Low plaster loss when immersed
- Provides fast initial setting time to ensure rapid fracture immobilisation
- Made to SANS quality standards

Delta-Lite® Plus

Delta-Lite® Plus is our new fibreglass cast tape that combines a fibreglass substrate and advanced water activated polyurethane resin system which provides tack free properties. The tack free properties allow ease of application and moulding using standard examination gloves.

**INDICATIONS**
- Primary and secondary casting
- Rigid support

**BENEFITS**
- Very smooth surface
- Less abrasive finished cast enhances patient comfort while it reduces clothing snags
- Excellent rigid support (immobilisation)
- Creates long-lasting, lightweight cast
- High lamination
- Creates a strong bond between layers ensuring a strong finished cast
- New resin formulation
- Use exam glove of your choice.
- Improves unrolling tension improving ease of cast application
- Good conformability
- Makes casting application easier with change of anatomy
- Outstanding moulding
- Produces an anatomically correct cast

Delta-Cast® Elite

Delta-Cast® Elite is a new standard in the field of rigid immobilisation using non-fibreglass material.
- Excellent cast strength and radiolucency.

**INDICATIONS**
- Primary and secondary casting
- Rigid support

**BENEFITS**
- Excellent unrolling characteristics
- Promote consistent unrolling tension and reduce constrictions
- Conformable substrate
- Patented extensible yarns allow cast tape to easily shape to body contours, providing enhanced moulding capabilities. Material combines strength and rigidity with soft edges for enhanced patient comfort
- Secure lamination
- Converts individual layers to a solid cast ensuring strong immobilisation
- A progressive casting solution
- Secure, light and comfortable in use. The smooth surface will not snag clothes and bed linens. Environmentally friendly Delta-Cast® Elite produces less dust during cast removal and can be disposed by incineration
- Hygienic solution for daily bathing and water contact
- Delta-Cast® Elite in conjunction with Delta-Dry® water resistant allowing the patient to keep up with daily hygiene without adding additional cost to protect the cast from getting wet

The new formula of Delta-Cast® Elite allows application with standard examination gloves.

Available in white only
**Delta-Cast® Prints**

Intended for rigid primary and secondary casting applications where colourful prints improve patient compliance and comfort. For an appealing cast finish with excellent cast strength and radiolucency.

**INDICATIONS**
- Primary and secondary casting
- Rigid support

**BENEFITS**
- Delta-Cast® Prints is comprised of patented polyester substrate which features extensible yarns that easily shape to body contours, providing enhanced moulding capabilities for both primary and secondary casting applications and produces less dust during cast removal
- Patented Resin System
  - Ensures maximum lamination and end laydown for strong, long-lasting casts
  - The patented glove system provides a tack-free application
- Long-Lasting, Vibrant Patterns
  - Delta-Cast® Prints, exclusive to BSN medical, is available in lively and fun prints

**Delta-Cast® Conformable™**

Provides rigid and semi-rigid casting options for primary and secondary casting applications where patient fit, comfort and compliance are critical.

- Excellent cast strength and radiolucency.

**INDICATIONS**
- Primary and secondary casting
- Rigid and semi-rigid support

**BENEFITS**
- Delta-Cast® Conformable is constructed using a patented latex-free, polyester substrate that provides unprecedented conformability for an enhanced fit and ease of application
- Soft edges and ease of removal with normal bandage scissors add to the appeal of this revolutionary cast tape
- A three-dimensional stretch eliminates the need to tuck and fold during application and prevents creases when casting around difficult body contours
- Patented Resin System
  - Ensures maximum lamination and end laydown for strong, long-lasting, lightweight casts
  - The patented glove system provides a tack-free application
- Inventory Reducing
  - When used with specialised application techniques, custom splints can be created reducing the need to stock off-the-shelf splints and braces
  - By utilising Delta-Cast® Conformable and the specialised application techniques, new treatment options enhance patient care, simplify cast removal and can reduce treatment costs

Dynacast® Prelude

A fully integrated splinting system available in both rolls and pre-cut strips.

INDICATIONS

For use on trauma injuries, orthopaedic conditions and support for soft tissue injuries.

BENEFITS

The first choice for convenience, economy and flexibility

• Cut to size rolls or pre-cut strips ensure convenience, saving time
• Minimal water requirement diminishes waste
• Early weight bearing saves time
• Various widths available for each application
• No wrong side application

Strong points

• Pre-assembled polyurethane coated fiberglass sandwiched in polypropylene padding
• Stabilisation in 2-4 minutes, load-bearing in 20 minutes
• Lightweight and compact

Clean application

• No plaster mess, easy to store

Preferred by patients

• Splint is strong, durable and comfortable
• Soft, double-sided padding minimises pressure points

Jobst® Comprifore

JOBST® Comprifore: The easy-to-use multi-layer bandaging set for sustained compression. The JOBST® Comprifore multi-layer set contains all components needed for adequate compression in the treatment of venous leg ulcers. With the new Cutimed® Sorbact® WCL it additionally offers a wound contact layer that provides bacterial and fungal binding action to reduce the risk of infection.

Compression can be considered the cornerstone in the therapy of venous leg ulcers. As indicated by numerous studies, adequate compression supports venous flow and shows significant effects on deep venous haemodynamics – ultimately providing large improvements in pain, mobility and general quality of life for the patient.

INDICATIONS

JOBST® Comprifore LF (latex free formula)
• For the treatment of venous leg ulcer (ABPI ≥ 0.8) *

JOBST® Comprifore lite LF (latex free formula)
• For reduced compression in treatment of mixed venous and arterial ulcer (0.6 < ABPI < 0.8) *

BENEFITS

Provides graduated compression of 40mmHg
• To reach the recommended pressure for the healing of venous leg ulcers

Provides sustained compression for up to 7 days
• Provides excellent cost-benefit ratio

Delivers high stiffness factor
• For effective compression

Allows for easy and safe application
• To minimise nursing time

Contains Cutimed® Sorbact® WCL
• Provides anti-bacterial and anti-fungal action on the wound surface

Latex-free
• For the reduction of risk of latex allergies

Is available as Comprifore® lite
• To provide reduced compression for mixed leg ulcers with an ABPI between 0.6 to 0.8 *

* ABPI: Ankle Brachial Pressure Index

JOBST® UlcerCARE® The compression system designed for maximum patient compliance. JOBST® UlcerCARE® enables effective management of a venous leg ulcer while offering ease of use at the same time – the perfect combination for providing patients with a higher quality of life.

**INDICATIONS**

For the treatment of venous leg ulcer (ABPI ≥ 0.8) *

**BENEFITS**

Provides graduated compression of 40mmHg
- To reach the recommended pressure for the healing of venous leg ulcers
Delivers a high stiffness factor
- To provide effective compression
- Is a 2-in-1 system
- For easy handling by patients or caregivers

**JOBST® UlcerCARE® Liner**
- Contains silk to promote healthy skin, facilitate donning and provide maximum compliance
- Provides mild compression for non-ambulatory patients to help manage lower leg oedema during bed rest
- May be worn 24 hours a day for non-ambulatory patients and to hold wound dressings in place
- Has integrated heel and toe for high wearing comfort
- Is washable at 60°C for hygienic re-use

**JOBST® UlcerCARE® Outer Stocking**
- Is designed for patient’s self management to facilitate easy changing of wound dressing and to allow for improved personal hygiene, e.g. bathing
- Shows low friction on the liner making it easy to don
- Has integrated heel and open toe for high wearing comfort
- Is washable at 40°C for hygienic re-use

The zippered version additionally
- Has an improved zipper for easy donning
- Is available with zipper on left or right side for comfortable closure on the opposite side of the wound
- Has an improved locking mechanism to keep the closed zipper in place

Has a fast moisture transport
- For more patient comfort
- Now comes in 7 sizes
- To fit a wide variety of leg shapes
- Is compatible with common footwear and clothing
- To enable a normal lifestyle

Compression can be considered the cornerstone in the therapy of venous leg ulcers. As indicated by numerous studies, adequate compression supports venous flow and shows significant effects on deep venous haemodynamics – ultimately providing large improvements in pain, mobility and general quality of life for the patient.

* ABPI: Ankle Brachial Pressure Index
Unparalleled sheerness for stylish leg therapy. An ideal combination of therapeutic effectiveness and sheer, lightweight, fashionable appearance.

**INDICATIONS**

- Gradient compression
- Accurate compression in three classes:
  - 15-20 mmHg
  - 20-30 mmHg
  - 30-40 mmHg
- Sheerest product in its class
- Available in a variety of styles and ready-to-wear sizes
- Enhances with silicon blend softener
- Machine washable

**BENEFITS**

- Provides relief and management of vascular disorders
- Provides benefits for a wide range of vascular disorders
- Increases compliance to help manage the disease
- Designed to fit 99% of all patients and suit their specific needs
- Allows for easy donning
- Very easy to care for

Effective leg therapy in a fine quality dress sock. Gradient compression means greater relief without sacrificing fashionable looks in these socks designed for business and casual occasions.

**INDICATIONS**

- Gradient compression
- Accurate compression in three classes:
  - 15-20 mmHg
  - 20-30 mmHg
  - 30-40 mmHg
- Fashionable ribbed design dress sock
- Made with microfibre yarns
- Smooth toe seam and bubble-shaped toe
- All-day comfort band
- Reinforced heel and resilient yarns

**BENEFITS**

- Provides relief and management of vascular disorders
- Provides benefits for a wide range of vascular disorders
- Increases compliance to help manage the disease
- Wicks away moisture to help keep feet cool, dry and comfortable
- Enhances wearing comfort
- Keeps the socks up without binding or pinching
- Allows for greater durability
